

CAMBO

23 SF

2 1/4 x 3 1/4" LARGE FORMAT CAMERA

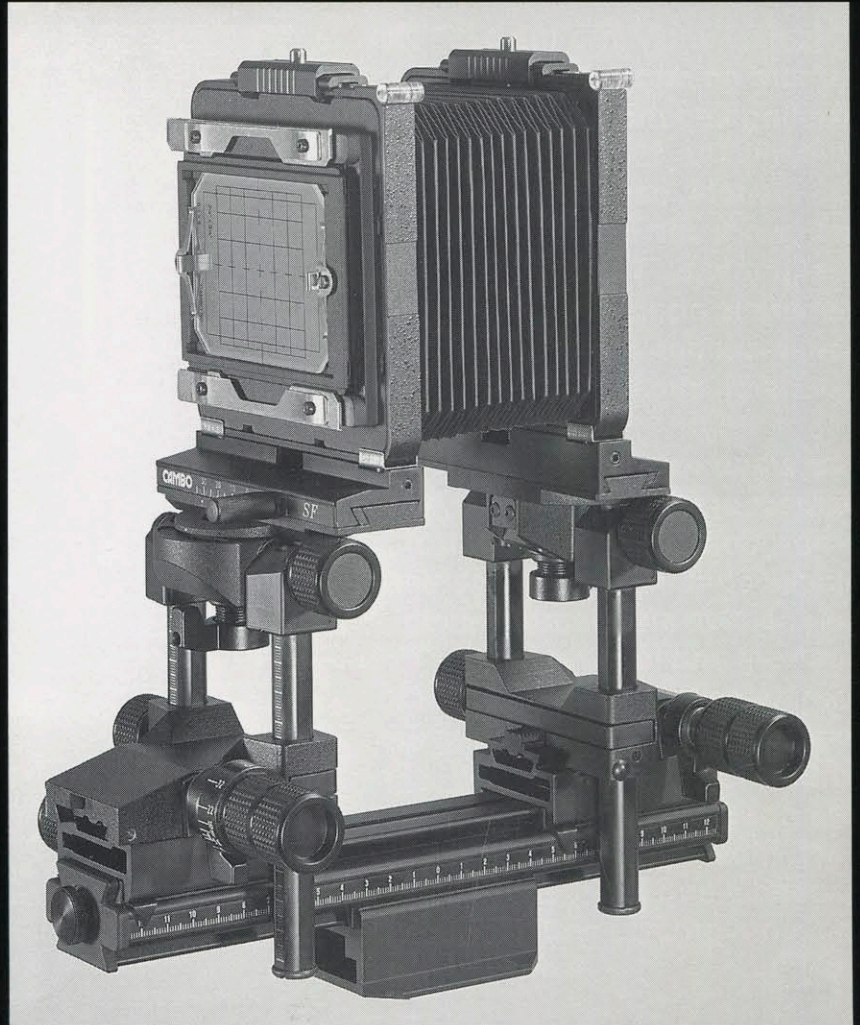

For those photographers who prefer a more compact and even lighter view camera but with all features as swings, tilts and shifts on both front and rear standard, Cambo has designed the 23 SF camera..

The 23 SF is based on the 45 SF camera and offers same movements and easiness of use as its 4x5" model.

Interchangeable frames offer a great flexibility in format changes, as the housings can be replaced by simply loosening two screws. There are conversion kits available to transfer a 23 SF camera into a 45 SF for both standards or rear standard only.

Cambo 23 SF camera features:

- Yaw-free vertical-axis-priority
- Rigid compatible monorail with extension capabilities
- Dual-range focusing system for precise fine and coarse focusing
- Depth-of-field scale for optimum focus control of close-ups
- Scaled movements and zero-position click-stops
- Minimum extension does not require a recessed lensboard
- Quick conversion from vertical to horizontal formats
- Compatible with Cambo's versatile accessory system
- Heavy-duty die-cast metal construction
- Easy format changes to 4x5" size

Specifications:

Monorail length 350 mm
Fine focus range 40 mm
Rise/Fall 83 mm
Lateral shift 70 mm

Extension rails: 250, 420 and 650 mm (optionals)

Swings +/- 30°
Base tilts +/- 90°
Weight 3600 gr.

CAMBO

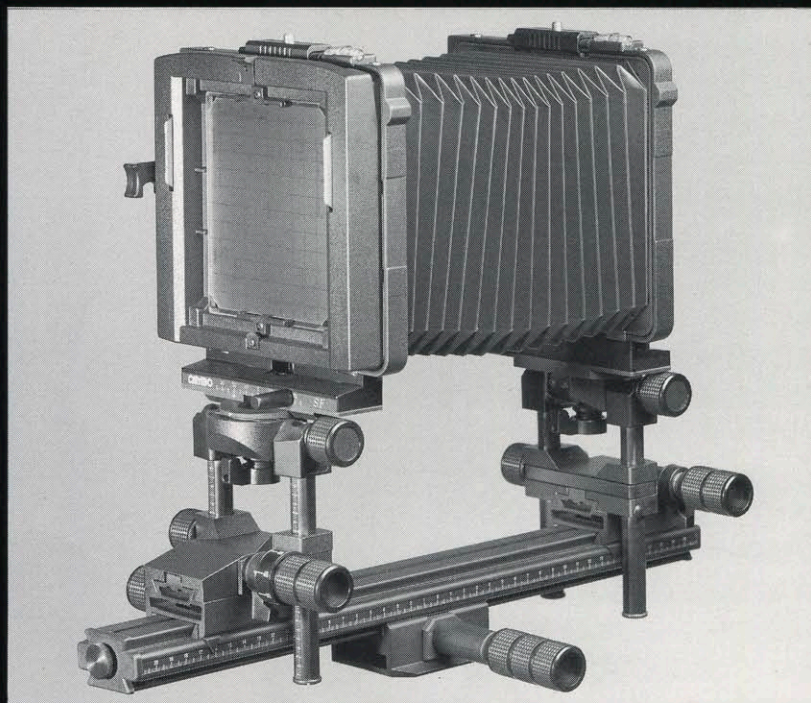

45 SF

4x5" LARGE FORMAT CAMERA

This new entry into the 4x5" view camera market is based on the existing Legend/Master monorail system. The 45 SF is a full-featured 4x5 camera, designed primarily for field work and on-location assignments. This lightweight camera is equipped with a lighter single-section monorail with extension capabilities.

The standards are designed in respect of reducing weight and proportions. The base control blocks contain all of the camera's perspective and depth-of-field controls and locking knobs. This eliminates the need to switch to different sections of the camera while concentrating on the composition on the ground glass. Each movement locks single-handedly and independently for the most precise and efficient operation.

The 45 SF is conveniently linked to Cambo's extensive view camera accessory system.

Cambo 45 SF features:

- Rigid compatible monorail with extension capabilities
- Dual-range focusing system for precise fine and coarse focusing
- Depth-of-field scale for optimum focus control of close-ups
- Scaled movements and zero-position click-stops
- Yaw-free vertical-axis-priority
- Minimum extension does not require a recessed lensboard
- International ground glass back, accepting all graflock backs
- Easy loading back release provides safe film holder insertion
- Quick conversion from vertical to horizontal formats
- Compatible with Cambo's versatile accessory system
- Heavy-duty die-cast metal construction
- Easy format changes

Specifications:

Monorail length 350 mm
Fine focus range 40 mm
Rise/Fall 83 mm
Lateral shift 70 mm

Extension rails: 250, 420 and 650 mm (optionals)
Swings +/- 30°
Base tilts +/- 90°
Weight 4200 gr.
